

DATA SHEET

LED SLIM CEILING LAMP ROUND 18W, 4200K, IP20

SPL1842R

DESCRIPTION

Powder-painted steel was used to make the lamp corrosion-resistant.

The ceiling lamps have a special optical system on each LED chip. It is a lens made of material with excellent optical and mechanical properties. In this way, a uniform distribution of light is achieved. The glare is reduced and the visual comfort is increased.

The diffusers are made of polyvinyl chloride. It is a flameretardant material with great mechanical strength and hardness.

Drivers have the necessary electromagnetic compatibility filters and meet all safety requirements. They guarantee reliability and long operating life.

The bodies have an elegant and stylish slim design, suitable for almost all types of rooms.

The beam angle is 160°, allowing a uniform illumination to be achieved.

The degree of protection is IP20, suitable for rooms with normal levels of dust and moisture.

BENEFITS

The ceiling lamps are suitable for living room, kitchen, corridor, bedroom and everywhere where it is necessary to create a cozy atmosphere.

Light technical information

- Rated luminous flux: 1200 lm
- Beam angle: 160°
- Correlated Color Temperature (CCT): 4200 K
- LED type: SMD 2835

Electrotechnical information

- Voltage: 220-240 V AC
- Frequency: 50-60 Hz
- Power: 18 W
- Driver: Вграден, недимиращ

Basic information

- Type of protection: IP20
- On/Off Cycles: >15 000
- Lumen Maintenance L80B50: >25 000 h
- Dimensions: Ø 330/60 mm
- Energy class: A+
- Warranty: 2 years
