

LED industrial lamp

Description

UltraLux presents a new **30W LED Industrial lamp** with color temperature **4200K** - neutral light.

The innovative shape and design provide an extremely **wide beam angle of 330°**.

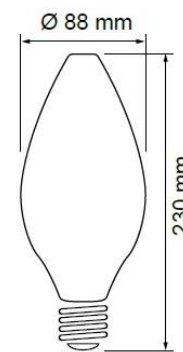

The housing is specially designed to provide better cooling using the air that passes through it. Better cooling significantly extends the service life.

The housing and diffusers are made of **UV-resistant polycarbonate** and with **high impact resistance**.

An extremely high quality driver is used, providing a long operating life without replacement or service.

The lamp has high power, high and stable light output and high energy efficiency - 90 lm/W, high power factor PF> 0.9, degree of protection - IP20.

Long warranty period - 3 years.

Technical information

art.No	Supply voltage	Luminous flux	Color temperature	Dimensions	Color rendering index	Socket
LB302742	230 V AC	2650 lm	4200 K	88/230 mm	Ra≥80	E27

Application

The lamp is extremely suitable for mounting in street and industrial luminaires - with more intense workloads and longer working life. Used for direct replacement of compact energy saving (CFL) and mercury lamps.
